

NEVER BUILD TWICE WITH STRATOSPHERE'S REUSE STUDIO

Stratosphere's Reuse Studio is a turnkey application available to all organizations involved in your Pega efforts. It allows them to submit and discover reusable Assets through an internal Asset Catalog. With a powerful user interface, the low-code solution gives program managers visibility into all available assets and their details across the organization. It reduces the investment required to launch technology-enabled processes and helps you measure the return on investment of the assets you build.

Maximize your PEGA investment by reusing assets

Your enterprise has invested heavily in the Pega platform, successfully implemented it across multiple lines of business and begun the process of establishing a Center of Excellence (COE) to promote the effective use of this technology. You're now ready to take the next step and elevate your reusable assets identification process - You require Reuse Studio. This is the next crucial step in any Pega intake evaluation process where you ensure duplicative efforts will NOT occur within your next project. Reuse Studio is the vital component to any organizations' efforts to lower time to market, reduce bottom line and realize a faster return on investment.

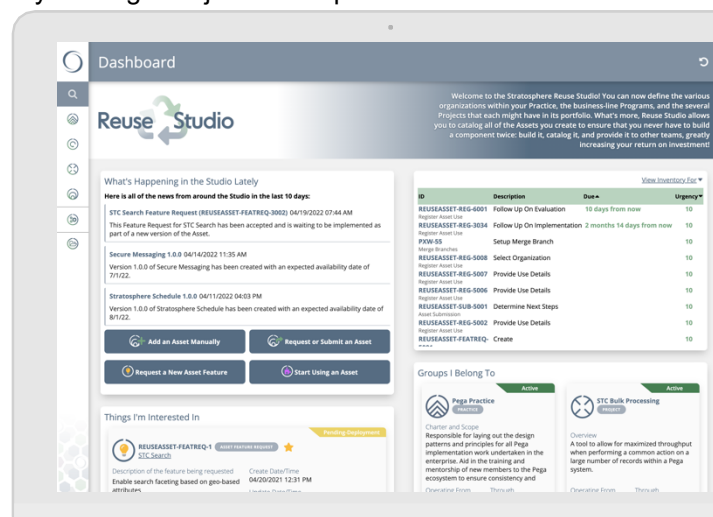

Reuse Studio allows you to create a single searchable enterprise library of available reusable Assets` such as, code, cases, documentation, and data. Practices, Programs and Projects download and register these reusable assets as components of their projects thereby generating return on investment (ROI) metrics for you to quantitatively demonstrate the benefits to your organization. Take your Pega Project Intake process to the next level with the integration of Stratosphere's Reuse Studio.

Why you need Reuse Studio

Creates an easy-to-search catalog of assets within an organization

Reduces the investment required to launch technology-enabled processes.

Provides program managers with visibility into available assets and their details across the organization

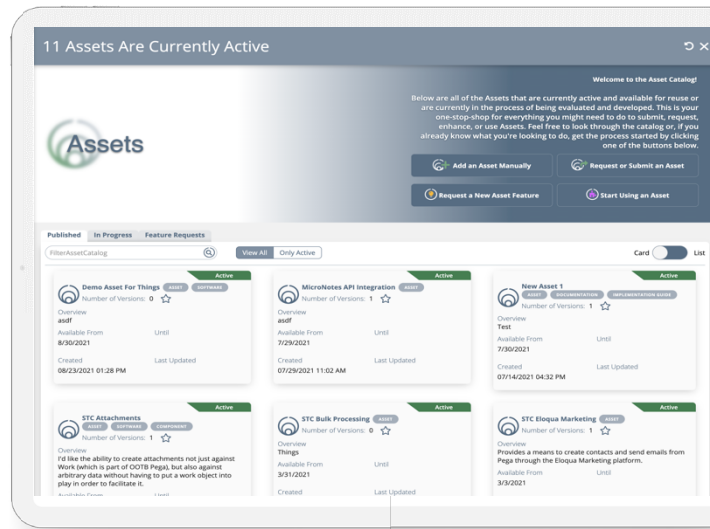

Calculates Return-on-Investment for enterprise components

Enables Updates to be made in a single location and automatically replicated everywhere

Catalogs assets across technologies, providing a comprehensive view

Expedites new resource onboarding, and provides continuity in resource transitions

RESULTS

Repurposed up to 75% of project content from existing projects, programs, and assets

Saved 90+ hours per quarter by using Reuse Studio to implement address validation component

Reduced Project Implementation Time By 30% through reuse of payment processing

Saved 75% of the cost required to integrate marketing technology by identifying reusable components

Detailed ROI Information

Development Cost	The total cost of developing all versions of STC Geospatial that have been released
\$10,000.00	
Implementation Savings	Based on the expected ROI for implementing the most recent release of STC Geospatial
\$125,000.00	
Realized Return on Investment	Realized return based on the sum of Implementation Savings multiplied by the number of implementations of each version, minus the overall Development Cost of STC Geospatial
\$690,000.00

The Pega + Reuse Studio Advantage

Stratosphere's Reuse Studio for Pega creates an internal catalog of all the components, frameworks, and tools (Assets) your organization has created. It allows your delivery teams to easily discover and register to reuse those Assets and for you to gain a clear understanding of the return on investment you're realizing from that reuse.
